

# Part 3

*In this part of the experiment, you have the following two options:*

*You can either **continue** or **quit**.*

*In this part of the experiment, you have the following two options:*

*You can either **continue** or **quit**.*

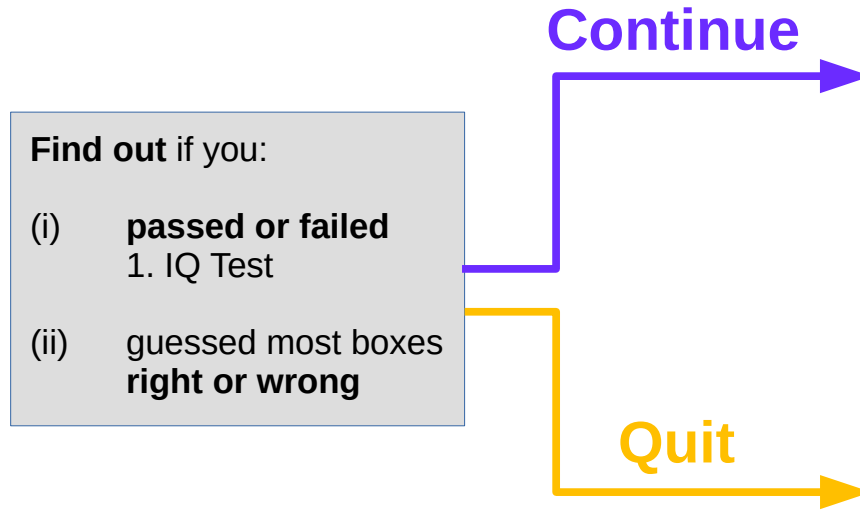

*Each option consists of three steps, which we will now explain in detail. Step 1 does not depend on whether you continue or quit.*

**Find out** if you:

- (i) **passed or failed**  
1. IQ Test
- (ii) guessed most boxes  
**right or wrong**

*Step 1:*

*You will find out whether you passed or failed the first IQ test, and whether you guessed most boxes right or wrong in the guessing game.*

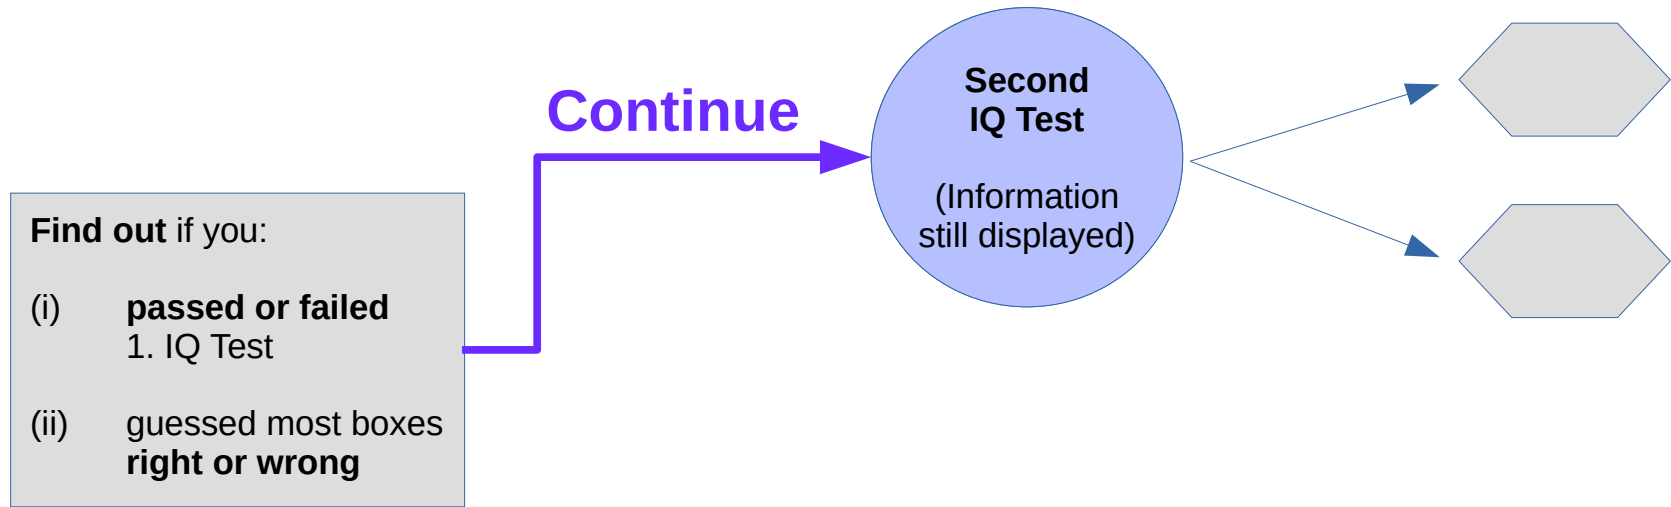

*Step 1:*

*You will find out whether you passed or failed the first IQ test, and whether you guessed most boxes right or wrong in the guessing game.*

*What happens in Step 2 and 3 will depend on whether you continue or quit.*

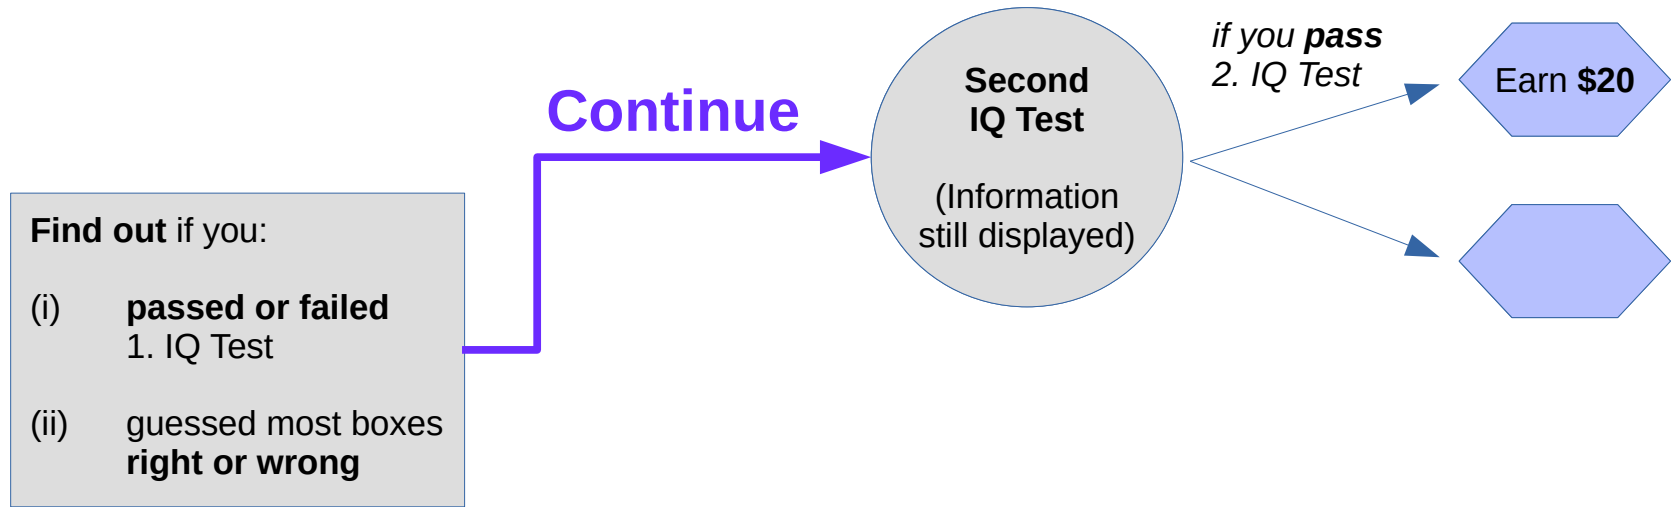

### *Step 2:*

*If you continue, you will then be asked to take a second IQ test.*

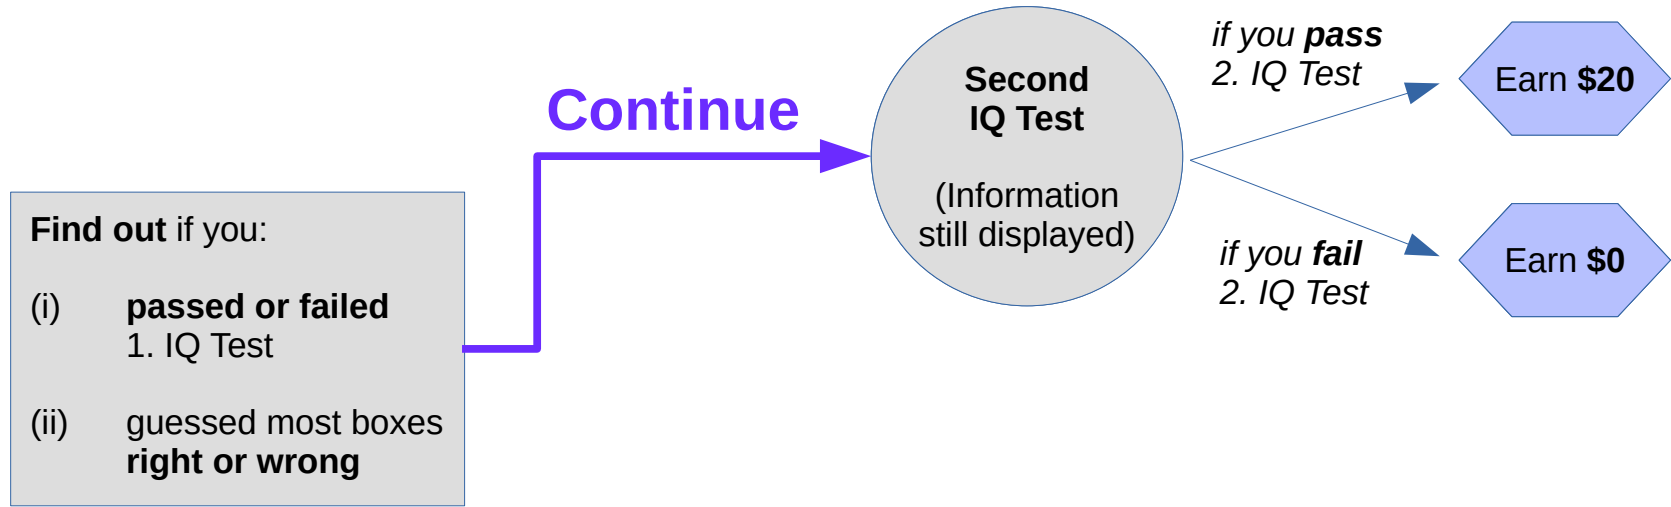

*While you take the second IQ test, the information from Step 1 will be displayed next to each question.*

*Step 3:*

*If you pass the second IQ test, you earn \$20.*

*Step 3:*

*If you pass the second IQ test, you earn \$20.*

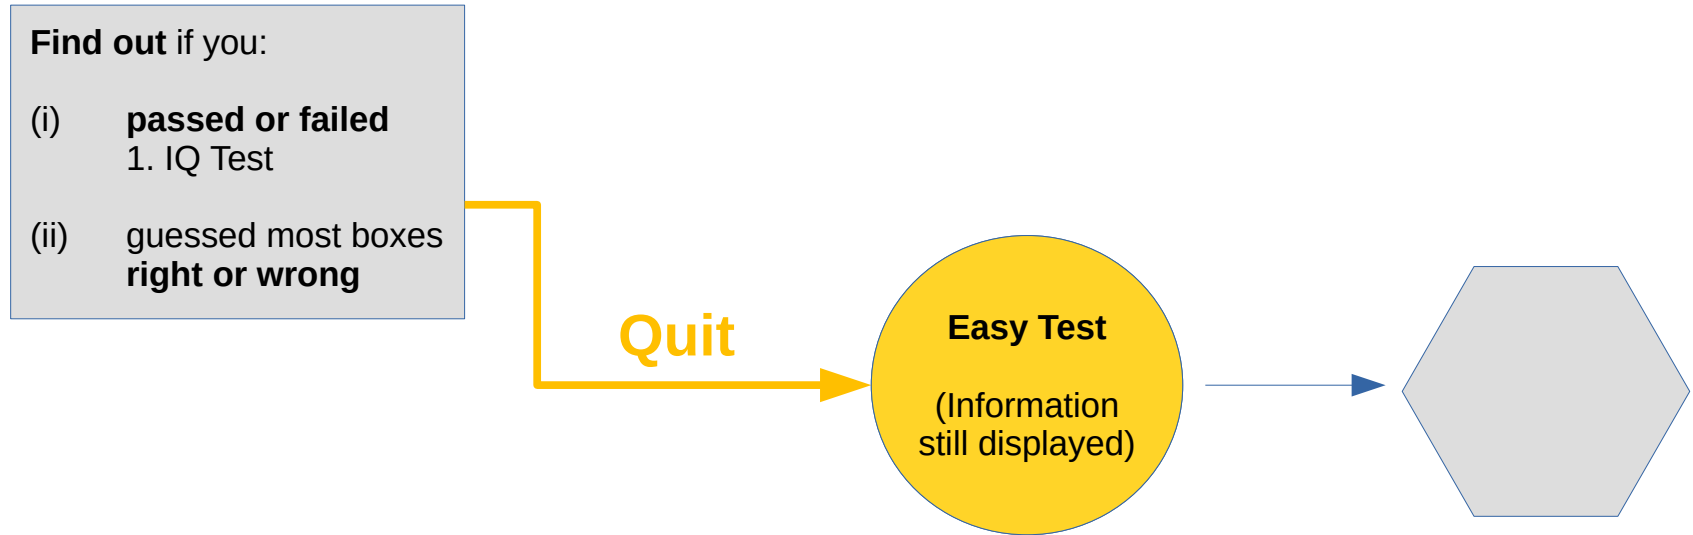

*If you fail the second IQ test, you earn \$0.*

**Find out** if you:

- (i) **passed or failed**  
1. IQ Test
- (ii) guessed most boxes  
**right or wrong**

**Quit**

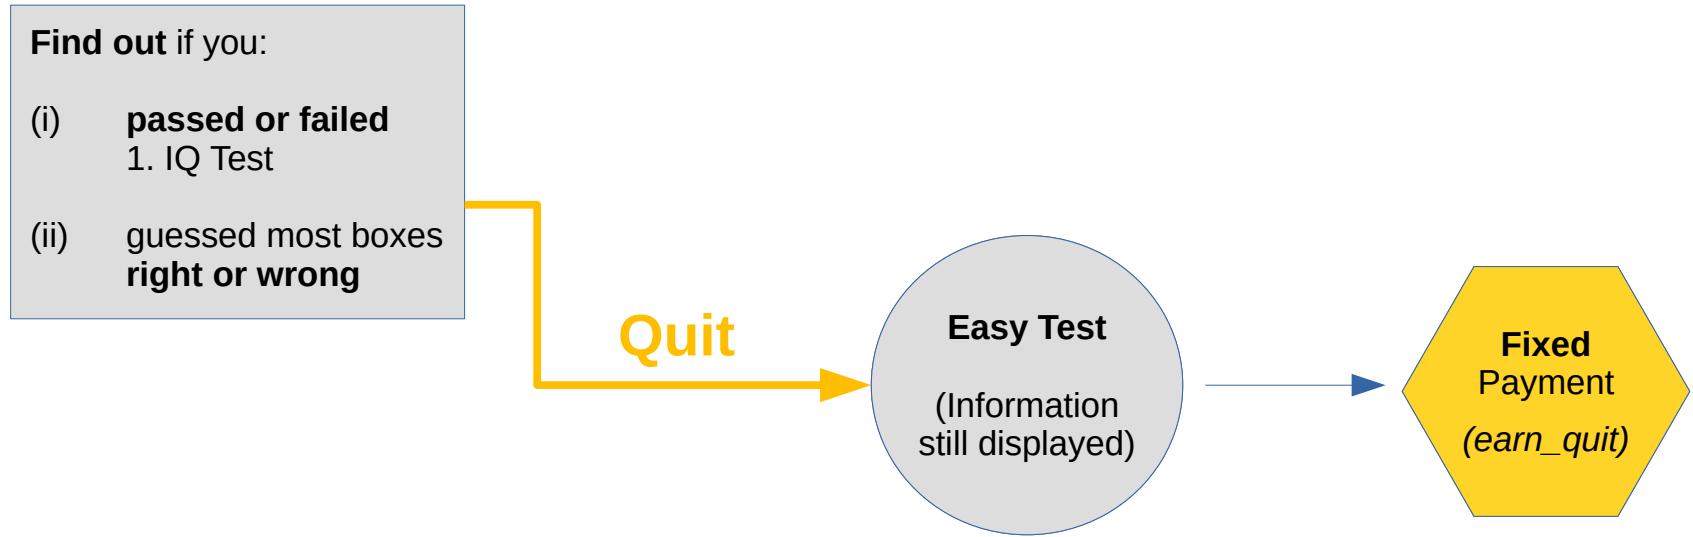

*Step 2:*

*If you quit, you will be asked to take a very easy test.*

*While you take the easy test, the information from Step 1 will be displayed next to each question.*

*Step 3:*

*You will earn a fixed  
payment, let's call this  
payment "earn\_quit".*

*Remember that the information from Step 1 – whether you passed or failed the first IQ test, and whether you guessed most boxes right or wrong – will be displayed while you take the next test.*

*Remember that the information from Step 1 – whether you passed or failed the first IQ test, and whether you guessed most boxes right or wrong – will be displayed while you take the next test.*

*If you **continue**, this information will be displayed next to each question of the second IQ test.*

*If you **quit**, this information will be displayed next to each question of the easy test.*

**Reminder:**

- **passed** or **failed** 1. IQ test,
- guessed **most boxes right/wrong**

We will now highlight what is different if you  
*continue* or *quit*.

We will now highlight what is different if you **continue** or **quit**.

No matter which path you take, you will spend the **same time** in the experiment.

Quitting does **not** mean that you finish earlier.

Difference 1: The test you will take

---

Difference 1: The test you will take

Continue

## Difference 1: The test you will take

**Continue**

*If you **continue**, you will take a **second IQ test**. This test will be of a similar style, and the **level of difficulty will be similar** to the IQ test you took at the beginning.*

## Difference 1: The test you will take

### Continue

If you *continue*, you will take a **second IQ test**. This test will be of a similar style, and the **level of difficulty will be similar** to the IQ test you took at the beginning.

- There will be 7 questions, and you will have 90 seconds to answer one question.
- You will **pass** this IQ test if you **solve at least 5 questions correctly**. Otherwise, you fail.
- Whether you pass or fail does not depend on the performance of other participants.
- You will not get any direct feedback on whether you passed or failed the second test.

## Difference 1: The test you will take

Quit

Continue

If you *continue*, you will take a **second IQ test**. This test will be of a similar style, and the **level of difficulty will be similar** to the IQ test you took at the beginning.

- There will be 7 questions, and you will have 90 seconds to answer one question.
- You will **pass** this IQ test if you **solve at least 5 questions correctly**. Otherwise, you fail.
- Whether you pass or fail does not depend on the performance of other participants.
- You will not get any direct feedback on whether you passed or failed the second test.

## Difference 1: The test you will take

Quit

If you **quit**, you will **take an easy test**. This test will be of a similar style, but **much easier** than the IQ test you took at the beginning.

Continue

If you **continue**, you will take a **second IQ test**. This test will be of a similar style, and the **level of difficulty will be similar** to the IQ test you took at the beginning.

- There will be 7 questions, and you will have 90 seconds to answer one question.
- You will **pass** this IQ test if you **solve at least 5 questions correctly**. Otherwise, you fail.
- Whether you pass or fail does not depend on the performance of other participants.
- You will not get any direct feedback on whether you passed or failed the second test.

## Difference 1: The test you will take

Quit

If you **quit**, you will **take an easy test**. This test will be of a similar style, but **much easier** than the IQ test you took at the beginning.

- There will be 7 questions, and you will have 90 seconds to answer one question.
- It is very likely that you **can solve all questions** of this easy test.
- You cannot “pass” or “fail” the easy test, and you won’t get any direct feedback on how well you did.

Continue

If you **continue**, you will take a **second IQ test**. This test will be of a similar style, and the **level of difficulty will be similar** to the IQ test you took at the beginning.

- There will be 7 questions, and you will have 90 seconds to answer one question.
- You will **pass** this IQ test if you **solve at least 5 questions correctly**. Otherwise, you fail.
- Whether you pass or fail does not depend on the performance of other participants.
- You will not get any direct feedback on whether you passed or failed the second test.

## Difference 2: Your payment

## Difference 2: Your payment

**Continue**

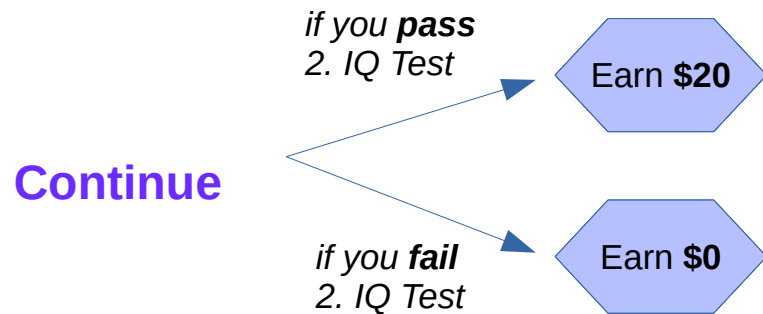

## Difference 2: Your payment

*If you **continue**, your payment will depend on whether you pass the second IQ test. You will earn either \$20 or \$0.*

- *If you **pass the 2. IQ Test**, you earn **\$20**.*
- *If you **fail the 2. IQ Test**, you earn **\$0**.*

## Difference 2: Your payment

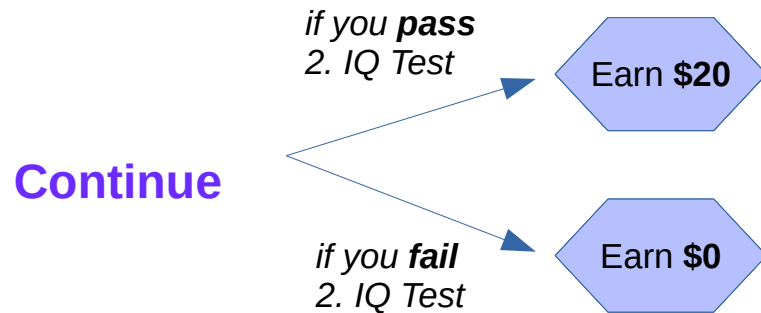

*If you **continue**, your payment will depend on whether you pass the second IQ test. You will earn either \$20 or \$0.*

- *If you **pass the 2. IQ Test**, you earn **\$20**.*
- *If you **fail the 2. IQ Test**, you earn **\$0**.*

*This means that if you **continue**, how much you earn in this part will entirely depend on passing the **2. IQ Test**.*

*Your performance on the 1. IQ Test will be irrelevant for your earnings in this part of the experiment.*

## Difference 2: Your payment

If you **continue**, your payment will depend on whether you pass the second IQ test. You will earn either \$20 or \$0.

- If you **pass the 2. IQ Test**, you earn \$20.
- If you **fail the 2. IQ Test**, you earn \$0.

This means that if you **continue**, how much you earn in this part will entirely depend on passing the **2. IQ Test**.

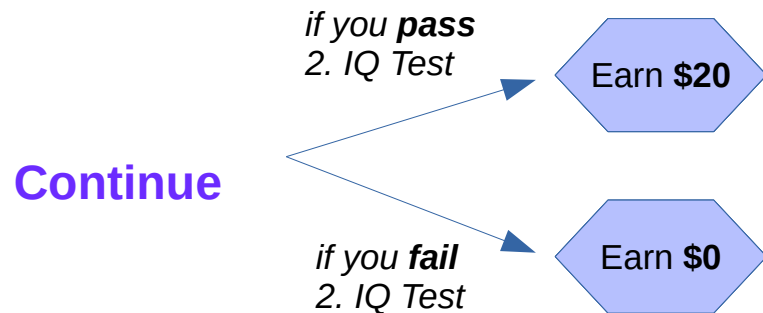

Your performance on the 1. IQ Test will be irrelevant for your earnings in this part of the experiment.

## Difference 2: Your payment

If you **quit**, you will get a fixed payment, **earn\_quit**.

This payment does **not** depend on your performance on the first IQ test or the easy test.

If you **continue**, your payment will depend on whether you pass the second IQ test. You will earn either \$20 or \$0.

- If you **pass the 2. IQ Test**, you earn **\$20**.
- If you **fail the 2. IQ Test**, you earn **\$0**.

This means that if you **continue**, how much you earn in this part will entirely depend on passing the **2. IQ Test**.

Your performance on the 1. IQ Test will be irrelevant for your earnings in this part of the experiment.

# What's next

1. *In what is next, we will show you the list of questions, and will ask you to report your switch point - the dollar value after which you would like to switch from Option A to Option B.*

# What's next

1. In what is next, we will show you the list of questions, and will ask you to report your switch point - the dollar value after which you would like to switch from *Option A* to *Option B*.

Q#		Option A		Option B	
1	Would you rather...	quit with <i>earn_quit</i> =\$22	or	continue	?
2	Would you rather...	quit with <i>earn_quit</i> =\$21	or	continue	?
3	Would you rather...	quit with <i>earn_quit</i> =\$20	or	continue	?
4	Would you rather...	quit with <i>earn_quit</i> =\$19	or	continue	?
.	.	.		.	
.	.	.		.	
.	.	.		.	
20	Would you rather...	quit with <i>earn_quit</i> =\$3	or	continue	?
21	Would you rather...	quit with <i>earn_quit</i> =\$2	or	continue	?
22	Would you rather...	quit with <i>earn_quit</i> =\$1	or	continue	?
23	Would you rather...	quit with <i>earn_quit</i> =\$0	or	continue	?

# What's next

1. In what is next, we will show you the list of questions, and will ask you to report your switch point - the dollar value after which you would like to switch from **Option A** to **Option B**.
2. Given your switch point, the computer knows for which dollar values of **earn\_quit** you prefer to **quit**, and for which values of **earn\_quit** you prefer to **continue**.

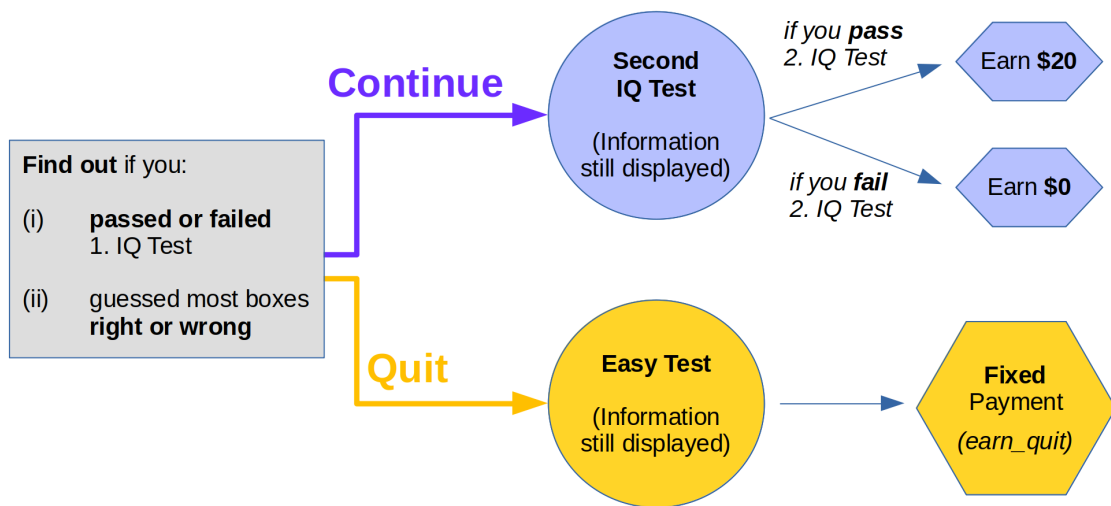

Q#		Option A		Option B	
1	Would you rather...	quit with <b>earn_quit=\$22</b>	or	continue	?
2	Would you rather...	quit with <b>earn_quit=\$21</b>	or	continue	?
3	Would you rather...	quit with <b>earn_quit=\$20</b>	or	continue	?
4	Would you rather...	quit with <b>earn_quit=\$19</b>	or	continue	?
.	.	.		.	
.	.	.		.	
.	.	.		.	
20	Would you rather...	quit with <b>earn_quit=\$3</b>	or	continue	?
21	Would you rather...	quit with <b>earn_quit=\$2</b>	or	continue	?
22	Would you rather...	quit with <b>earn_quit=\$1</b>	or	continue	?
23	Would you rather...	quit with <b>earn_quit=\$0</b>	or	continue	?

# What's next

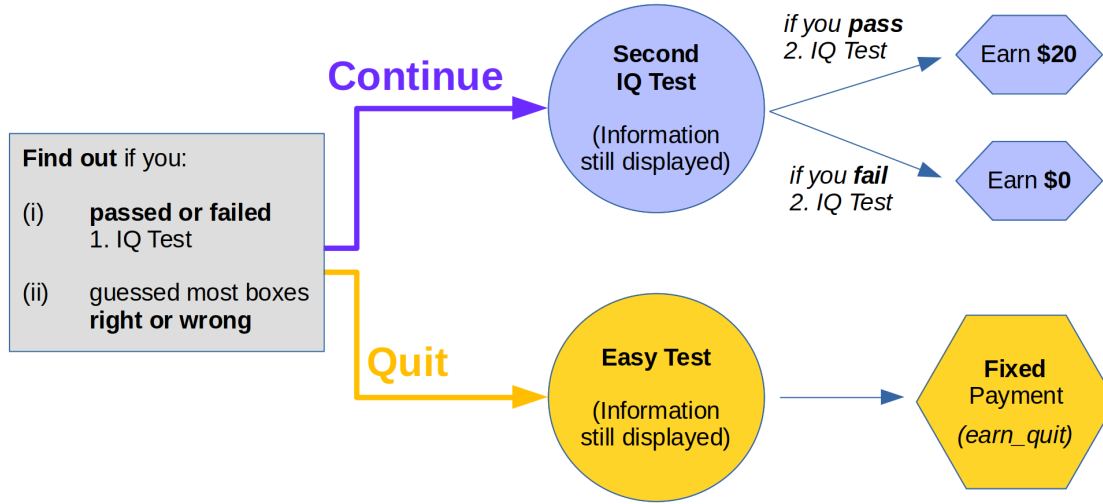

1. In what is next, we will show you the list of questions, and will ask you to report your switch point - the dollar value after which you would like to switch from **Option A** to **Option B**.
2. Given your switch point, the computer knows for which dollar values of **earn\_quit** you prefer to **quit**, and for which values of **earn\_quit** you prefer to **continue**.
3. It is important that you report your **true switch point**, so that you end up with the option you like more in each case.

Q#		Option A		Option B	
1	Would you rather...	quit with <b>earn_quit=\$22</b>	or	continue	?
2	Would you rather...	quit with <b>earn_quit=\$21</b>	or	continue	?
3	Would you rather...	quit with <b>earn_quit=\$20</b>	or	continue	?
4	Would you rather...	quit with <b>earn_quit=\$19</b>	or	continue	?
.	.	.		.	
.	.	.		.	
.	.	.		.	
20	Would you rather...	quit with <b>earn_quit=\$3</b>	or	continue	?
21	Would you rather...	quit with <b>earn_quit=\$2</b>	or	continue	?
22	Would you rather...	quit with <b>earn_quit=\$1</b>	or	continue	?
23	Would you rather...	quit with <b>earn_quit=\$0</b>	or	continue	?

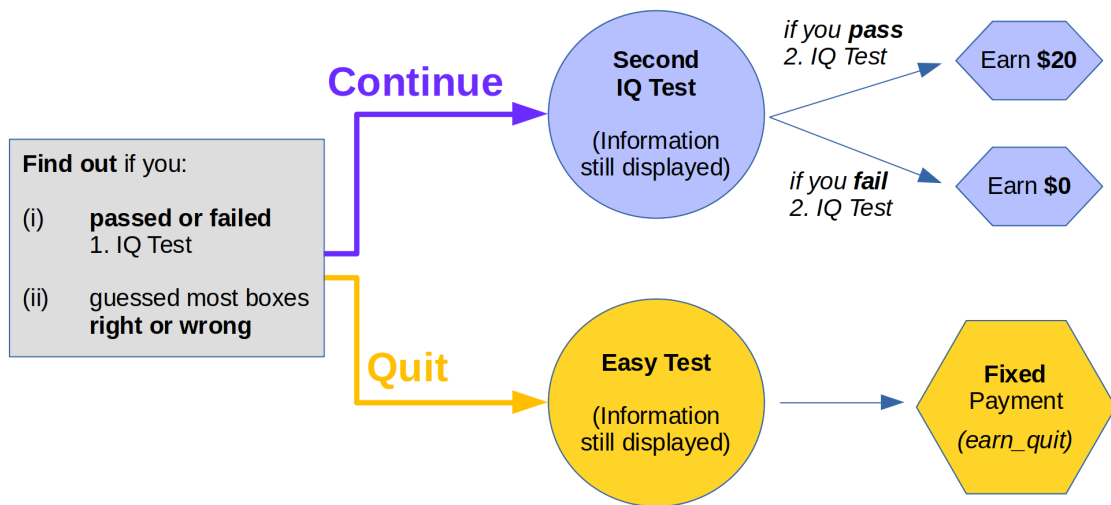

Q#		Option A		Option B	
1	Would you rather...	quit with $earn\_quit = \$22$	or	continue	?
2	Would you rather...	quit with $earn\_quit = \$21$	or	continue	?
3	Would you rather...	quit with $earn\_quit = \$20$	or	continue	?
4	Would you rather...	quit with $earn\_quit = \$19$	or	continue	?
.	.	.		.	
.	.	.		.	
.	.	.		.	
20	Would you rather...	quit with $earn\_quit = \$3$	or	continue	?
21	Would you rather...	quit with $earn\_quit = \$2$	or	continue	?
22	Would you rather...	quit with $earn\_quit = \$1$	or	continue	?
23	Would you rather...	quit with $earn\_quit = \$0$	or	continue	?

Here is an example:

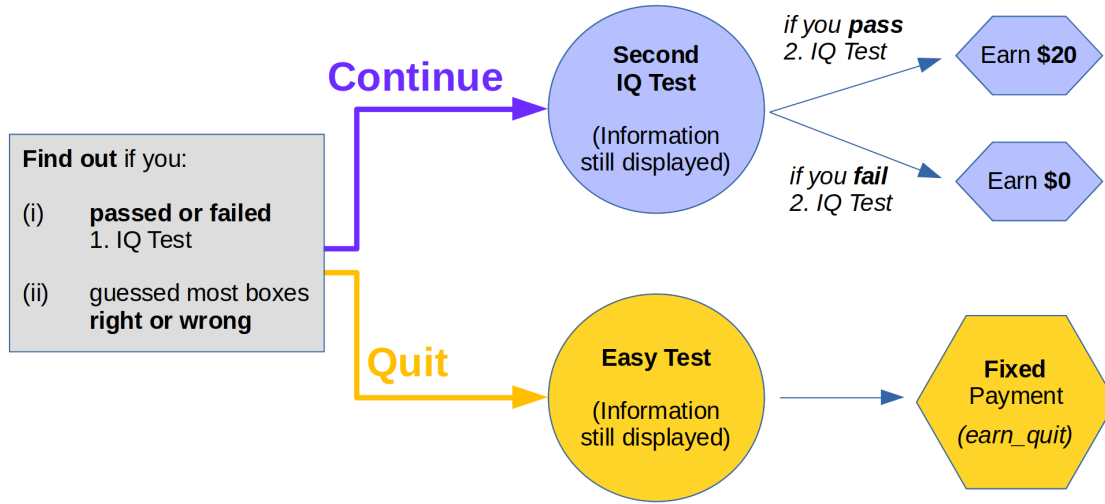

Q#		Option A		Option B	
1	Would you rather...	quit with $earn\_quit=\$22$	or	continue	?
2	Would you rather...	quit with $earn\_quit=\$21$	or	continue	?
3	Would you rather...	quit with $earn\_quit=\$20$	or	continue	?
4	Would you rather...	quit with $earn\_quit=\$19$	or	continue	?
.	.	.		.	
.	.	.		.	
.	.	.		.	
20	Would you rather...	quit with $earn\_quit=\$3$	or	continue	?
21	Would you rather...	quit with $earn\_quit=\$2$	or	continue	?
22	Would you rather...	quit with $earn\_quit=\$1$	or	continue	?
23	Would you rather...	quit with $earn\_quit=\$0$	or	continue	?

Here is an example:

- Suppose you would rather **quit**, but only if the fixed payment you get for quitting, **earn\_quit**, is at least \$11. For lower values of **earn\_quit**, you would rather **continue**.

Q#		Option A		Option B	
1	Would you rather...	quit with <b>earn_quit</b> =\$22	or	<b>continue</b>	?
2	Would you rather...	quit with <b>earn_quit</b> =\$21	or	<b>continue</b>	?
3	Would you rather...	quit with <b>earn_quit</b> =\$20	or	<b>continue</b>	?
4	Would you rather...	quit with <b>earn_quit</b> =\$19	or	<b>continue</b>	?
.	.	.		.	
.	.	.		.	
.	.	.		.	
20	Would you rather...	quit with <b>earn_quit</b> =\$3	or	<b>continue</b>	?
21	Would you rather...	quit with <b>earn_quit</b> =\$2	or	<b>continue</b>	?
22	Would you rather...	quit with <b>earn_quit</b> =\$1	or	<b>continue</b>	?
23	Would you rather...	quit with <b>earn_quit</b> =\$0	or	<b>continue</b>	?

Here is an example:

- Suppose you would rather **quit**, but only if the fixed payment you get for quitting, **earn\_quit**, is at least \$11. For lower values of **earn\_quit**, you would rather **continue**.
- In this case, you should report a switch point of \$11. This means that:
  - If a question with an **earn\_quit** of \$11 or higher is drawn, the computer will make sure **you quit**.
  - If a question with an **earn\_quit** of less than \$11 is drawn, the computer will make sure **you continue**.

Q#		Option A		Option B	
1	Would you rather...	quit with <b>earn_quit</b> =\$22	or	continue	?
2	Would you rather...	quit with <b>earn_quit</b> =\$21	or	continue	?
3	Would you rather...	quit with <b>earn_quit</b> =\$20	or	continue	?
4	Would you rather...	quit with <b>earn_quit</b> =\$19	or	continue	?
.	.	.		.	
.	.	.		.	
.	.	.		.	
20	Would you rather...	quit with <b>earn_quit</b> =\$3	or	continue	?
21	Would you rather...	quit with <b>earn_quit</b> =\$2	or	continue	?
22	Would you rather...	quit with <b>earn_quit</b> =\$1	or	continue	?
23	Would you rather...	quit with <b>earn_quit</b> =\$0	or	continue	?

Here is an example:

- Suppose you would rather **quit**, but only if the fixed payment you get for quitting, **earn\_quit**, is at least \$11. For lower values of **earn\_quit**, you would rather **continue**.
- In this case, you should report a switch point of \$11. This means that:
  - If a question with an **earn\_quit** of \$11 or higher is drawn, the computer will make sure **you quit**.
  - If a question with an **earn\_quit** of less than \$11 is drawn, the computer will make sure **you continue**.

### Example.

Your switch point: \$11

This means:

- You choose to **quit** if **earn\_quit** is \$11 or more.
- You choose to **continue** if **earn\_quit** is less than \$11.

Q#		Option A		Option B	
1	Would you rather...	quit with <b>earn_quit</b> =\$22	or	<b>continue</b>	?
2	Would you rather...	quit with <b>earn_quit</b> =\$21	or	<b>continue</b>	?
3	Would you rather...	quit with <b>earn_quit</b> =\$20	or	<b>continue</b>	?
4	Would you rather...	quit with <b>earn_quit</b> =\$19	or	<b>continue</b>	?
.	.	.		.	
.	.	.		.	
.	.	.		.	
20	Would you rather...	quit with <b>earn_quit</b> =\$3	or	<b>continue</b>	?
21	Would you rather...	quit with <b>earn_quit</b> =\$2	or	<b>continue</b>	?
22	Would you rather...	quit with <b>earn_quit</b> =\$1	or	<b>continue</b>	?
23	Would you rather...	quit with <b>earn_quit</b> =\$0	or	<b>continue</b>	?

Q#		Option A		Option B	
1	Would you rather...	quit with $earn\_quit = \$22$	or	continue	?
2	Would you rather...	quit with $earn\_quit = \$21$	or	continue	?
3	Would you rather...	quit with $earn\_quit = \$20$	or	continue	?
4	Would you rather...	quit with $earn\_quit = \$19$	or	continue	?
.	.	.		.	
.	.	.		.	
.	.	.		.	
20	Would you rather...	quit with $earn\_quit = \$3$	or	continue	?
21	Would you rather...	quit with $earn\_quit = \$2$	or	continue	?
22	Would you rather...	quit with $earn\_quit = \$1$	or	continue	?
23	Would you rather...	quit with $earn\_quit = \$0$	or	continue	?

Here is an example:

- Suppose you would rather **quit**, but only if the fixed payment you get for quitting,  $earn\_quit$ , is at least \$11. For lower values of  $earn\_quit$ , you would rather **continue**.
- In this case, you should report a switch point of \$11. This means that:
  - If a question with an  $earn\_quit$  of \$11 or higher is drawn, the computer will make sure **you quit**.
  - If a question with an  $earn\_quit$  of less than \$11 is drawn, the computer will make sure **you continue**.

### Example.

Your switch point: \$11

This means:

- You choose to **quit** if  $earn\_quit$  is \$11 or more.
- You choose to **continue** if  $earn\_quit$  is less than \$11.

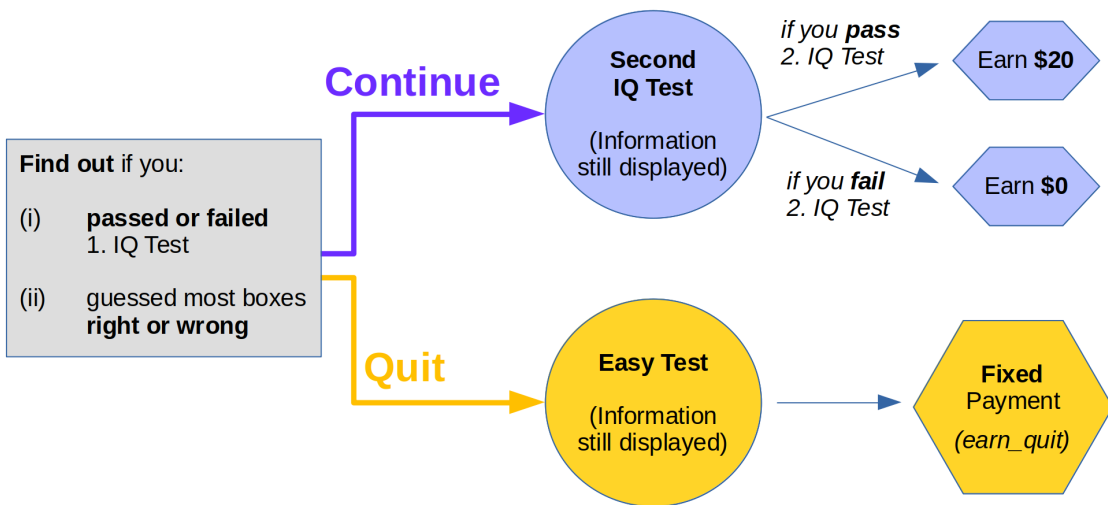

Remember that reporting a switch point of \$11, for example, does not guarantee that you get paid at least \$11 in this part of the experiment. It also depends on which question gets drawn!

Make sure the slider is in the correct position before you move on.

Q#		Option A		Option B	
1	Would you rather...	quit with $earn\_quit = \$22$	or	continue	?
2	Would you rather...	quit with $earn\_quit = \$21$	or	continue	?
3	Would you rather...	quit with $earn\_quit = \$20$	or	continue	?
4	Would you rather...	quit with $earn\_quit = \$19$	or	continue	?
.	.	.		.	
.	.	.		.	
.	.	.		.	
20	Would you rather...	quit with $earn\_quit = \$3$	or	continue	?
21	Would you rather...	quit with $earn\_quit = \$2$	or	continue	?
22	Would you rather...	quit with $earn\_quit = \$1$	or	continue	?
23	Would you rather...	quit with $earn\_quit = \$0$	or	continue	?

Make sure the slider is in the correct position before you move on.

Here are two more examples of how your slider and switch point could look like.

### Example.

Your switch point: \$19

This means:

- You choose to **quit** if **earn\_quit** is \$19 or more.
- You choose to **continue** if **earn\_quit** is less than \$19.

### Example.

Your switch point: \$3

This means:

- You choose to **quit** if **earn\_quit** is \$3 or more.
- You choose to **continue** if **earn\_quit** is less than \$3.

Q#		Option A		Option B	
1	Would you rather...	quit with <b>earn_quit</b> =\$22	or	continue	?
2	Would you rather...	quit with <b>earn_quit</b> =\$21	or	continue	?
3	Would you rather...	quit with <b>earn_quit</b> =\$20	or	continue	?
4	Would you rather...	quit with <b>earn_quit</b> =\$19	or	continue	?
.	.	.		.	
.	.	.		.	
.	.	.		.	
20	Would you rather...	quit with <b>earn_quit</b> =\$3	or	continue	?
21	Would you rather...	quit with <b>earn_quit</b> =\$2	or	continue	?
22	Would you rather...	quit with <b>earn_quit</b> =\$1	or	continue	?
23	Would you rather...	quit with <b>earn_quit</b> =\$0	or	continue	?
