Overview: 4 Parts

The remainder of the experiment consists of **4 parts**.

At the end, the computer will **randomly draw** one **part that counts for payment**, and each part is equally likely to be drawn. You won't be told which part was drawn for payment.

Your **total earnings** in this experiment will be:

- Your earnings in the part that is drawn for payment,

PLUS

- A show-up fee of \$5.

Part 1: IQ test

Part 1: IQ test

1. *In a few minutes, you will be asked to take an **IQ test**. This test is frequently used to **measure intelligence**.*

Part 1: IQ test

1. *In a few minutes, you will be asked to take an **IQ test**. This test is frequently used to **measure intelligence**.*

*The IQ test will consist of **7 questions**.*

- You **pass** this test if you **answer at least 5** of these questions **correctly**.
- **Otherwise**, you **fail**.

Part 1: IQ test

1. *In a few minutes, you will be asked to take an **IQ test**. This test is frequently used to **measure intelligence**.*

*The IQ test will consist of **7 questions**.*

- You **pass** this test if you **answer at least 5** of these questions **correctly**.
- **Otherwise**, you **fail**.

2. *You will have **90 seconds to answer one question**, and a timer will indicate how much time is left. After 90 seconds have passed, your answers will be submitted automatically.*

***Unanswered** questions will be counted as **wrong**.*

Part 1: IQ test

1. In a few minutes, you will be asked to take an **IQ test**. This test is frequently used to **measure intelligence**.

The IQ test will consist of **7 questions**.

- You **pass** this test if you **answer at least 5** of these questions **correctly**.
- **Otherwise**, you **fail**.

2. You will have **90 seconds to answer one question**, and a timer will indicate how much time is left. After 90 seconds have passed, your answers will be submitted automatically.

Unanswered questions will be counted as **wrong**.

3. Whether you pass or fail the test will **not** depend on how other participants perform on the test. All that matters is how many questions **you** get right.

Part 1: IQ test

1. In a few minutes, you will be asked to take an **IQ test**. This test is frequently used to **measure intelligence**.

The IQ test will consist of **7 questions**.

- You **pass** this test if you **answer at least 5** of these questions **correctly**.
- **Otherwise**, you **fail**.

2. You will have **90 seconds to answer one question**, and a timer will indicate how much time is left. After 90 seconds have passed, your answers will be submitted automatically.

Unanswered questions will be counted as **wrong**.

3. Whether you pass or fail the test will **not** depend on how other participants perform on the test. All that matters is how many questions **you** get right.

4. Here's how you get paid in this part of the experiment:

- If you **pass the IQ test**, you get paid **\$20**.
- If you **fail the IQ test**, you get paid **\$0**.
